

There are 14 potentially active fault lines in areas near the crisis-hit Fukushima No. 1 nuclear power plant and other nuclear-related facilities, the Japanese government has announced.

Five of the 14 fault lines are near Tokyo Electric Power Co.'s Fukushima No. 1 and No. 2 nuclear power plants.

The other nine are near Japan Atomic Power Co.'s Tokai No. 2 power plant and the Japan Atomic Energy Agency's Tokai reprocessing plant in Ibaraki Prefecture.

**TVNL Comment: The people who allowed these plants to be build, creating a threat to all of our lives and to the planet on which we live, are the real terrorists of this world. They are the real threat to us all.**
