

How Effective is Conventional Cancer Treatment? The findings of this study would be of little surprise to many; in fact, some would even say chemo must surely have caused or hastened more than a quarter of the deaths. Chemotherapy, after all, as virtually everyone "knows", is a severely toxic treatment method, and a person has to be "strong enough" to withstand it, which is extremely strange and illogical considering that cancer patients already have seriously compromised immune systems. There is, really, nothing intuitively right about the use of chemo to deal with cancer.
