

It seems that the days of using YouTube as #1 media to distribute documentaries, videos and presentations about the truth of Israel and Zionist and their horrific war-crimes history and terrorism profile, has come to END.

Yesterday, it was announced that YouTube officially connected to the infamous ADL as partner to "Fight Against Hate."

YouTube has reached out to the Anti-Defamation League (ADL) for its expertise in dealing with hate on the Internet. In one outgrowth of that partnership, the League is now a contributor to YouTube's newly launched Abuse & Safety Center, where users are empowered to identify and confront hate, and to report abuses.

The YouTube Abuse & Safety Center features information and links to resources developed by ADL to help Internet users respond to and report offensive material and extremist content that violates YouTube's Community Guidelines on hate speech. ...

The YouTube Abuse & Safety Center was unveiled on December 11 at the annual conference of the Family Online Safety Institute in Washington D.C. and can be found at [http://help.youtube.com/support/youtube/bin/request.py?contact\\_type=abuse](http://help.youtube.com/support/youtube/bin/request.py?contact_type=abuse).

I know it sounds too weird to believe, but that's the news. YouTube now has on-board one of the US's domestic branches of Israel's intelligence service, the Mossad. The ADL, the Mossad's most "professional" organizations whose "speciality is spreading hate", are recruited as a professionals in the just struggle of "fighting against hate"?!

This partnership has many dimensions and should not be taken lightly.

1. As YouTube is one of the most viewed websites worldwide, controlling it means controlling the minds of hundreds of millions of its viewers. This is significant if we look at last year's YouTube report in which Harris Interactive said,

about 32 percent of frequent YouTube users are watching less TV as a result of the time they spend online. Of the frequent YouTube users, 66 percent claim they are sacrificing other activities when on YouTube, including other websites (36 percent), time spent watching TV (32 percent),...

It is also significant if we know that about 700,000 people do watch the YouTube concert at its peak. Imagine you are in control and show one pro-Zionist and anti-Arab/anti-Islam ad during the show.

A couple of days ago, in continuing its dominance of online video, Comscore announced these astonishing figures:

YouTube reached a record 99.5 million visitors in October, according to comScore. How dominant is that? The report indicates that, in total, 147 million people watched video online in the US during the month, meaning better than 2 in 3 watched it using a Google property. Overall, growth in online video remains robust, increasing 45 percent from last year to 13.5 billion total monthly views.

Knowing all the above facts and knowing what ADL stands for makes one 'feel sick to one's stomach'. It means that hundreds of millions of Americans and others around the world are now going to be officially brainwashed by the Mossad and under censorship for everything they say, upload, document and view on YouTube.

2. From now on, you should expect that no more videos that are anti-Zionist, anti-Israel, anti-war and anti-war crimes to be shown for more than the few hours (if lucky enough) after you upload your video. Sooner or later - and the period depends how critical the video is - all will be tagged with the infamous "anti-Semitism" tag and will be removed, ultimately the user will be blocked and banned. In no time, YouTube will become the official oasis for Mossad, therefore, only the Zionist version of the story will be found and endorsed by the media that follows blindly. I regret to break this news to you, but from now on Israel controls the most influential and powerful alternative media. No more "Israel crimes" to be seen or found and only pro-Zionist, pro-Israel users will continue to control the media, not only conventional, but online.

3. No more 9-11 facts, especially these connected to Israel, and they are countless. These videos and documentaries were and still are, some of the most powerful eye openers for millions who would like and need to know the hidden facts behind 9-11. The same facts which the US puppet government tried to hide from its citizens and the world. Searching YouTube (at least now, before the ADL manages to remove them all) for Israel connection to 9-11 will reveal hundreds of hours of documentaries that no one should miss if s/he really cares to know the truth behind 9-11. "What are you doing putting this stuff out there? You're killing us!" These were the words of Abraham H. Foxman, Executive National Director of the infamous Anti-Defamation League. Foxman shouted this during a sit-down he demanded to have with an unnamed Fox News executive shortly after Sept. 11.

4. The "New Era" will flourish the anti-Arab, anti-Islam, anti-Christ, pro-Neocon and pro-Nazi videos. ADL is widely known for all the above and are specialized in it. Their history is full of cases that flip facts and spread hate. Who can forget that after Islam, Arab and anyone who criticizes the Zionist, it was the turn of Christ and Christians. Abraham H. Foxman (ADL National Director) once told Christians that they should deny part of the historical facts and rip out some parts of the Bible. In other words, change Christian faith so they are not labelled anti-Semitic! Another example of Foxman was slamming only Muslim Congressman.
