

Air Force nuclear unit fails inspection

Friday, 19 December 2008 02:59 -

For the fifth time this year, a U.S. Air Force nuclear weapons unit failed an inspection, this time because of failure to document its handling of nuclear missiles and other critical issues, Air Force officials said.

Additionally, failures included having some personnel on duty without proper medical clearance and failure to inspect radiation detectors.

Other units that failed inspections this year included two bomb wings and two missile units.
