

UFOs have allegedly been seen by hundreds of witnesses close to the wind turbine that many suspect was hit by an alien spaceship.

Residents claimed to have seen bright flashing spheres in the skies near Louth, Lincolnshire, where the 290ft turbine was mangled in a mystery collision.

Ministry of Defence insiders have reportedly said the UFOs could be unmanned stealth bombers on test flights.

The black delta-wing craft, called Taranis, is understood to have been making test runs on the coastal bombing ranges at Donna Nook and North Coates, which are right next to the site of the wrecked wind turbine.
